Pattern notes:

Final size of the toy with recommended materials and tools-18 cm tall.

Skill level - advanced beginner - intermediate. This pattern is not learning material; you need to have basic crochet skills to finish the pattern.

This is written PDF material, US crochet terms are used.

Work in a continuous spiral, starting from a foot to make body.

You add arms while crocheting. Wire frame inside. Wig is a separate part.

You need to crochet it and sew. Stuff body tight as you go. It may help to use a wooden stick or eyebrows tweezers to stuff the item. It is better to use a cut of wasted thread (contrast color) instead of stitch marker. Its position is mentioned in the text.

It is necessary to control position of stitch marker to keep symmetrical line. When you finish the current round and notice that marker moves right, you need to work one stitch into the first st of the next round and move the round marker behind the last worked stitch. So the 2nd st of the next round becomes the first now. If you notice that the marker moves left, you need to unravel one stitch (or more if needed) and again move the round marker behind the last worked stitch. Please note that it is not an increase. You do not increase or decrease the amount of stitches. The stitch count remains the same.

Make invisible decreases.

Look over the whole pattern and only then start working.

Thank you for choosing me!
